INTRODUCCIÓN

El análisis de la producción bibliográfica (bibliometría) es fundamental para un sistema de salud que fomenta la investigación, ya que la bibliometría es, junto con las patentes y los productos de transferencia, un indicador de la eficiencia investigadora de sus profesionales. La producción científica refleja la capacidad de los investigadores de, empleando los medios que el sistema aporta, generar conocimiento científico capaz de ser difundido.

La Fundación Vasca de Investigación e Innovación Sanitarias (Bioef), entre sus tareas de fomento de la investigación, ha considerado el análisis bibliométrico como una potente herramienta que permite dar visibilidad a los resultados de la investigación biomédica desarrollada en el Sistema Sanitario Público Vasco y también permite dar reconocimiento a los profesionales que, con su esfuerzo y rigor, logran publicar sus resultados.

El objetivo de este documento es presentar de forma descriptiva los resultados de la producción bibliométrica del sistema vasco de salud durante el año 2013.

METODOLOGÍA

Para la obtención de los datos en los que está basado este informe, se han explotado las bases de datos EMBASE, Medline e ISI Web of Science (ISI WOS) para el periodo de tiempo comprendido entre el 01/01/2013 y el 31/12/2013. La búsqueda se ha realizado en base al criterio de filiación mediante la siguiente estrategia de búsqueda:

((vasco or euskadi or basque or Baracaldo or Baracaldo or Bilbao or bilbo or donosti* or "san Sebastian" or Vizcaya or bizkaia or guipuzcoa or gipuzkoa or alava or araba or Vitoria or gasteiz or Vitoria-gasteiz or osakidetza or "osasun saila" or BIOEF or OIKER or OBERRI or biodonostia or biocruces or Galdakao or Galdacano or Zumarraga or Mendaro or bidaso) not (Nigeria or "San Sebastian de los Reyes" or "Francisco de Vitoria" or "C\Francisco de Vitoria" or "Vasco de Quiroga" or "Universidad de San Sebastian").in.

Fig. nº 1- Criterio de búsqueda

Se han considerado para este análisis artículos originales, editoriales, cartas y revisiones. Se han excluido las comunicaciones a congresos, las correcciones, las notas y los libros. Cabe señalar como importante limitación de los resultados aquí presentados, la falta de exhaustividad de los mismos, justificada, en parte, por la desigual estrategia de filiación seguida por los profesionales de la sanidad vasca. En este momento, no existe una instrucción clara de registro de filiación y es frecuente que los profesionales registren sus centros de trabajo de modo muy diverso lo cual dificulta extraordinariamente la tarea de búsqueda y clasificación de artículos.

○ **Gestión de las referencias obtenidas**

Las referencias obtenidas se han gestionado mediante una base de datos creada con el programa Access. Se han filtrado los datos obtenidos de las bases de datos bibliográficas para seleccionar aquellos correspondientes al sistema sanitario vasco, identificar los centros de trabajo de los autores vascos firmantes del artículo y para obtener y sistematizar datos considerados relevantes para el presente análisis.

Estos son, a modo de ejemplo, algunos de los criterios de filtrado empleados:

CENTROS	CRITERIOS DE FILTRADO
	<p><i>*University Hospital of Alava* ___ *University Hospital Araba* ___ *Santiago Apostol Hosp* ___ *Hospital Universitario de Santiago Apostol* ___ *Hospital Universitario Araba* ___ *Hospital Universitario Alava-Santiago* ___ *Hospital Txagorritxu* ___ *Hospital Santiago Apostol* ___ *Hospital of Alava* ___ *Hospital de Txagorritxu* ___ *Hosp Univ Santiago Apostol* ___ *Hosp Univ Araba* ___ *Hosp Univ Alava* ___ *Hosp Txagorritxu* ___ *Hosp Alava* ___ *Araba Univ Hosp* ___ *Alava Univ Hosp* ___ *HUA*</i></p>

	<p><i>*Galdakao Primary Care Center, Basque Healthcare Service, Galdakao, Spain* ___ *Hospital Galdakao-Usansolo* ___ *Hospital de Galdakao* ___ *Hospital de Galdacano* ___ *Hosp Galdakano* ___ *H. de Galdakao* ___ *Galdakao Hosp* ___</i></p>

Tabla 1 - Criterio de filtrado

o Variables analizadas

Para cada artículo identificado, se han recogido las siguientes variables: título, fecha de publicación, autores, centros de trabajo de todos los autores, revista y cuartil (el mejor para las revistas con más de uno) y factor de impacto (FI). Los datos relativos a la revista, su FI y cuartil se han obtenido de la Web of Science (WOS) y son los correspondientes a los valores de 2013.

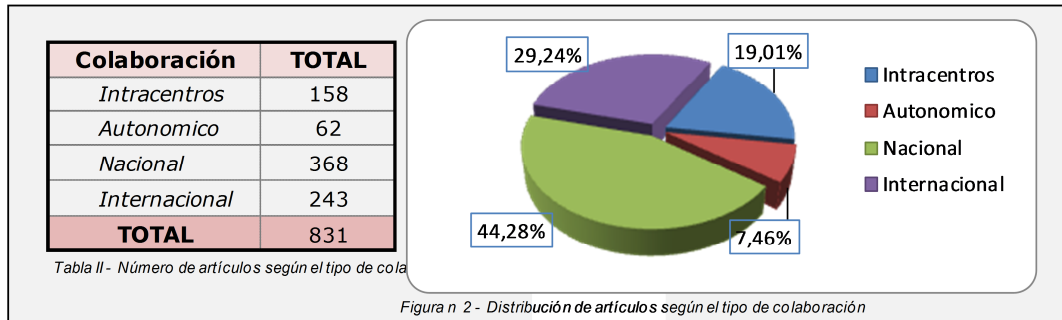

Además, se ha señalado el carácter nacional o internacional de las revistas citadas y se han analizado los centros de trabajo de los autores de cada artículo con el fin de identificar el tipo de colaboración que ha permitido su publicación. De este modo, se clasifican como colaboración intracentro aquellos casos en los que todos los autores firmantes pertenecen al mismo centro de trabajo; colaboración autonómica, cuando los autores pertenecen a distintos centros de la Comunidad Autónoma Vasca; nacional, cuando algún autor pertenece a una institución de ámbito estatal y finalmente, internacional, cuando entre los autores firmantes, al menos uno trabaja en un centro extranjero.

Con estos datos, se desarrolla una serie de análisis descriptivos sobre las características de la producción bibliométrica de los profesionales de la red sanitaria pública vasca: artículos publicados en revistas con factor de impacto, entre estos, distribución por cuartiles, carácter nacional o internacional de la publicación y tipo de colaboración entre autores. Estos datos se presentan para el total de la producción y posteriormente, para cada organización de servicios de la red sanitaria. Este informe considera las Organizaciones de Servicios vigentes en 2013.

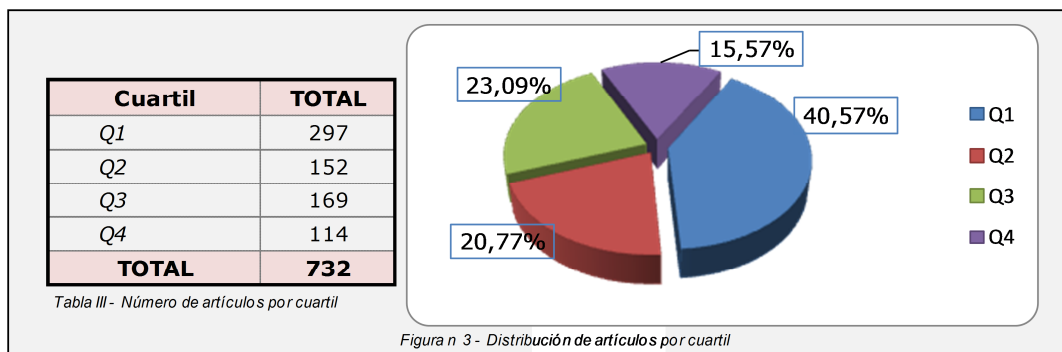

RESULTADOS GLOBALES

De la aplicación del criterio de búsqueda antes descrito en las bases de datos propuestas y para el periodo de interés y el filtrado efectuado con los criterios anteriormente presentados, se obtiene un total de 831 artículos, de los cuales 732 están publicados en revistas con factor de impacto.

En cuanto al formato de colaboración entre los autores de un artículo, resulta destacable que el 29.24 % de artículos publicados se haya desarrollado en una colaboración de tipo internacional. Asimismo, es llamativa la baja colaboración entre autores de distintos centros de la comunidad autónoma, con solo un 7,46% del total.

Del total de 831, un 88.08% (732 artículos) fueron publicados en revistas con factor de impacto. En la siguiente gráfica, se muestra la distribución por cuartiles de las revistas en las que aparecieron los artículos registrados.

El análisis que se presenta a continuación, hace referencia a los 732 artículos publicados en revistas con factor de impacto

Como se aprecia, el 40,57% de los artículos se publican en revistas del primer cuartil y si se consideran los artículos publicados en revistas del

primero y segundo cuartil conjuntamente, constituyen 61.34% de la producción.

A continuación, se presenta de forma cruzada, la información relativa a los cuartiles de las revistas en las que se ha producido la publicación y el origen nacional o internacional de la revista. Los porcentajes se refieren al total de artículos. Como es esperable, en el primer cuartil casi la totalidad se produce en revistas internacionales. Se muestra, a continuación una tabla resumen de estos datos.

Tipo Revista	Q1		Q2		Q3		Q4		TOTAL "Q"
	#	%	#	%	#	%	#	%	
Nacional	7	0,96%	11	1,50%	74	10,11%	75	10,25%	167
Internacional	290	39,62%	141	19,26%	95	12,98%	39	5,33%	565
TOTAL	297	40,57%	152	20,77%	169	23,09%	114	15,57%	732

Tabla IV - Distribución de artículos según el tipo de revista y cuartil

Son siempre más frecuentes las publicaciones internacionales, que de forma global, publican un 77,18 % de los artículos.

En lo que a la relación entre el tipo de colaboración y la relevancia de la revista en la que se publica el trabajo, medida ésta por su cuartil, estos son algunos aspectos destacables: el mayor número de publicaciones en el primer cuartil procede de colaboraciones internacionales (144 seguidas de las nacionales (117), mientras que el mayor número de publicaciones del cuarto cuartil se generan mediante colaboraciones nacionales (45) e intracentro(20).

Colaboración	Q1		Q2		Q3		Q4		TOTAL "Q"
	Nacional	Internacional	Nacional	Internacional	Nacional	Internacional	Nacional	Internacional	
Intracentros	4	11	4	13	29	15	20	10	106
Autonomico	0	21	0	14	1	9	6	6	57
Nacional	3	114	3	66	40	47	45	18	336
Internacional	0	144	4	48	4	24	4	5	233
TOTAL	7	290	11	141	74	95	75	39	732
	0,96%	39,62%	1,50%	19,26%	10,11%	12,98%	10,25%	5,33%	

Tabla V - Distribución de artículos según el tipo de colaboración y cuartil

A modo de resumen, se puede afirmar que la producción bibliométrica de los profesionales de la red sanitaria pública vasca se realiza en revistas de alto impacto, y basadas en colaboraciones en la esfera estatal e intracentro.

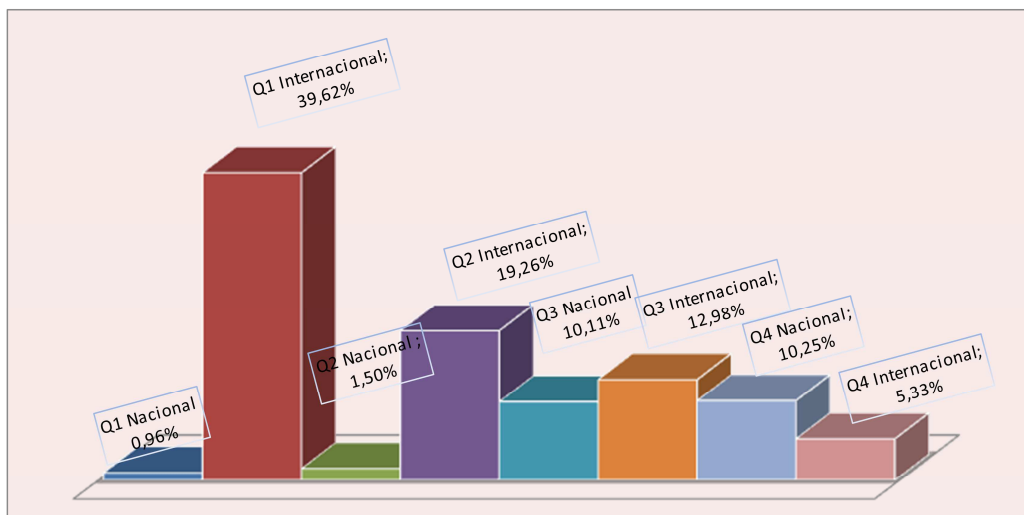

Figura n 4- Distribución de artículos según el tipo de cuartil y publicación.

Resulta llamativo el bajo porcentaje de artículos procedentes de colaboraciones de ámbito autonómico. El tipo de colaboración no determina de forma significativa el grado de impacto de la revista aunque sí resulta más exitosa, en términos relativos, la colaboración internacional.

RESULTADOS POR CENTRO

A continuación se presenta el análisis para las organizaciones de servicios de la red sanitaria pública vasca (OOSS). Como se indicaba anteriormente, la definición de estas OOSS corresponde al ordenamiento existente en 2013- Para este análisis se ha atribuido a cada centro el total de artículos en los que un trabajador del centro fuera firmante del mismo. La suma total de artículos de todos los centros supera, por tanto, las cifras generales hasta ahora citadas ya que un mismo artículo se atribuye a todos los centros de los que haya autores firmantes.

En la siguiente tabla, se muestra, en la primera columna, el total de artículos publicados por centro, en la segunda, el total de artículos publicados en revistas con FI y en la tercera, se proporciona el FI acumulado para cada centro. La tabla, así como el informe posterior, se ordena en función del FI acumulado mostrado en esta tabla

CENTROS	PUBLICADOS		
	Total Publicados	# con FI	FI Acumulado
Hospital Universitario de Cruces /BioCruces	258	243	844,172
Hospital Universitario Donostia/BioDonostia	246	224	818,108
Hospital Universitario de Araba	131	113	606,782
Departamento de Salud del Gobierno Vasco	110	103	497,461
Hospital Galdakano-Usansolo	97	83	258,875
Hospital de Basurto	104	89	255,558
Osakidetza Organización Central	24	18	34,863
BIOEF	13	13	21,533
Red de Salud Mental de Bizkaia	7	6	21,447

Tabla VI - Número de artículos publicados por organización de servicios

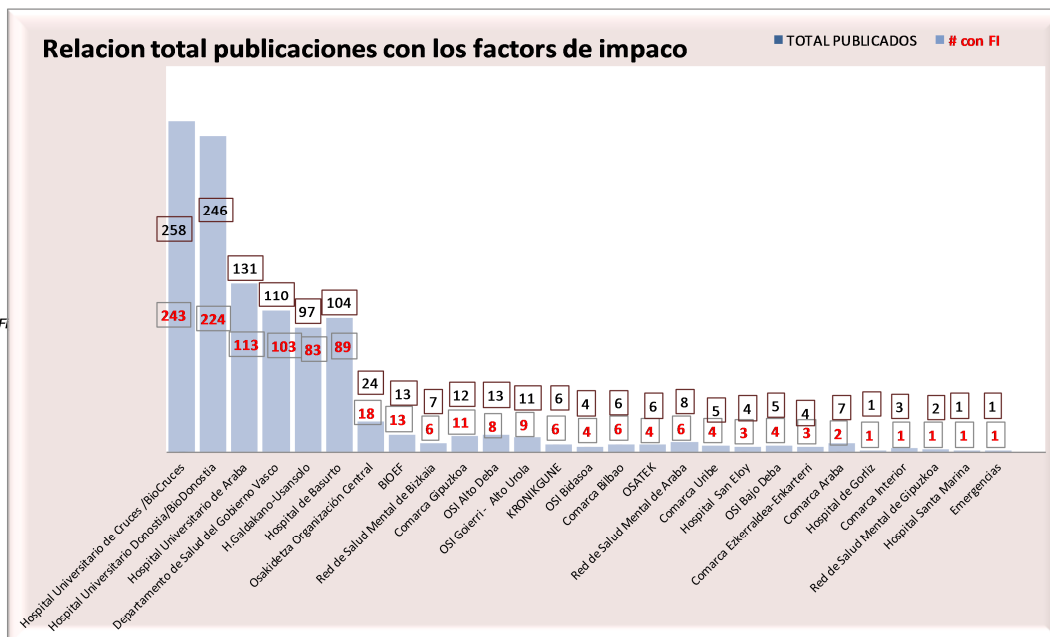

Figura n 5- Número de artículos totales y con factor de impacto, por organización de servicios.

La siguiente tabla muestra las diez publicaciones con mayor factor de impacto publicadas en 2013 con participación de profesionales de la red sanitaria vasca.

	AUTORES	CENTRO	TITULO ARTICULO	REVISTA	FI
1	Estruch, Ramon; Ros, Emilio; Salas-Salvado, Jordi; Covas, Maria-Isabel;..... Aros, Fernando; Angel Martinez-Gonzalez, Miguell	HUA - Hospital Universitario de Araba	Primary prevention of cardiovascular disease with a Mediterranean diet.	New England Journal of Medicine	54,420
2	Moran, Antoinette; Bundy, Brian; Becker, Dorothy J.; DiMeglio, Linda A.;..... Castano, Luis; Mandrup-Poulsen, Thomas	Hospital Universitario Cruces /BioCruces	Interleukin-1 antagonism in type 1 diabetes of recent onset: Two multicentre, randomised, double-blind, placebo-controlled trials.	The Lancet	39,207
3	Rebagliato, Marisa; Vioque, Jesus; Jose Arrizabalaga, Juan	HUA - Hospital Universitario de Araba	Iodine supplements during and after pregnancy.	JAMA - Journal of the American Medical Association	30,387
4	Gasparini, Maurizio; Proclemer, Alessandro; Klersy, Catherine; Kloppe, Axel;.... Martinez Ferrer, Jose Bautista; Arenal, Angel	HUA - Hospital Universitario de Araba	Effect of long-detection interval vs standard-detection interval for implantable cardioverter-defibrillators on antitachycardia pacing and shock delivery: The advance III randomized clinical trial.	JAMA - Journal of the American Medical Association	30,387
5	Martinez-Garcia, Miguel-Angel; Capote, Francisco; Campos-Rodriguez, Francisco; Lloberes, Patricia; Duran-Cantolla, Joaquin; Aizpuru, Felipe. Montoya, Jesus, Mado	HUA - Hospital Universitario de Araba	Effect of CPAP on blood pressure in patients with obstructive sleep apnea and resistant hypertension: The HIPARCO randomized clinical trial.	JAMA - Journal of the American Medical Association	30,387
6	Raaschou-Nielsen, Ole; Andersen, Zorana J.; Beelen, Rob; Samoli, Evangelia; Tamayo, Ibon; Hoek, Gerard	Dpto. de Sanidad y Consumo GV	Air pollution and lung cancer incidence in 17 European cohorts: Prospective analyses from the European Study of Cohorts for Air Pollution Effects (ESCAPE).	The Lancet Oncology	24,725
7	Pivot, Xavier; Gligorov, Joseph; Mueller, Volkmar; Barrett-Lee, Peter; Lopez-Vivanco, Guillermo; Fallowfield, Lesley	Hospital Universitario Cruces /BioCruces	Preference for subcutaneous or intravenous administration of trastuzumab in patients with HER2-positive early breast cancer (PreHer): An open-label randomised study.	The Lancet Oncology	24,725
8	Rice, Gillian I.; Forte, Gabriella M. A.; Szykiewicz, Marcin; Chase, Diana S.; Botella, Maria P.;... Gener, Blanca; Crow, Yanick .	HUA - Hospital Universitario de Araba Hospital Universitario Cruces /BioCruces	Assessment of interferon-related biomarkers in Aicardi-Goutieres syndrome associated with mutations in TREX1, RNASEH2A, RNASEH2B, RNASEH2C, SAMHD1, and ADAR: A case-control study.	The Lancet Neurology	21,823
9	Valcarcel, David; Adema, Vera; Sole, Francesc; Ortega, Margarita; Nomdedeu, Benet; ... Ardanaz, Maite; ... Vallespi, Teresa.	HUA - Hospital Universitario de Araba	Complex, not monosomal, karyotype is the cytogenetic marker of poorest prognosis in patients with primary myelodysplastic syndrome.	Journal of Clinical Oncology	17,960
10	Kreimer, Aimee R.; Johansson, Mattias; Waterboer, Tim; Kaaks, Rudolf; ... Larranaga, Nerea; Brennan, Paul.	Dpto. de Sanidad y Consumo GV	Evaluation of Human Papillomavirus Antibodies and Risk of Subsequent Head and Neck Cancer	Journal of Clinical Oncology	17,960

Tabla VII -Detalle de los artículos publicados con mayor Factor de Impacto

Resulta especialmente destacable la participación del HU Araba en seis de estos diez artículos.

Por segundo año consecutivo, la revista de mayor impacto en la que han publicado los profesionales de la red de salud vasca es New England Journal of Medicine, en este caso con un artículo firmado por D. Fernando Aros del Hospital Universitario de Araba. La siguiente revista en cuanto a FI es Lancet, en la que se publicó un artículo firmado por D. Luis Cataño y en tercer lugar JAMA, con tres artículos formados por Felipe Aizpuru Barandiaran, Joaquín Duran Cantolla, Juan José Arrizabalaga, y José Bautista Martínez Ferrer, respectivamente.

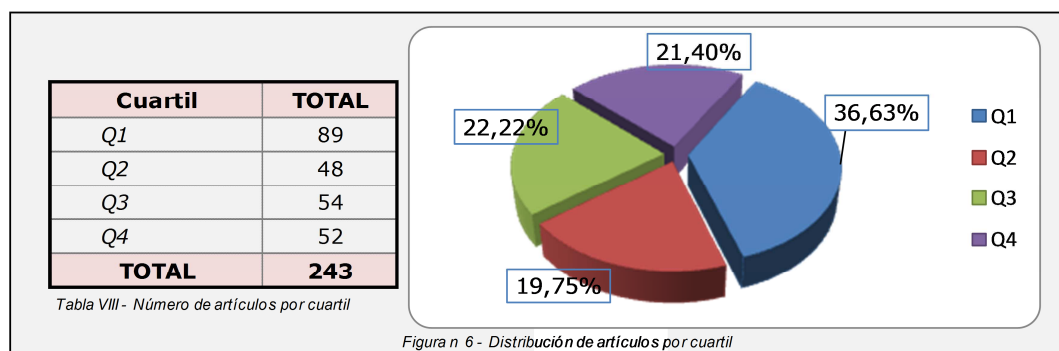

Todos los artículos están basados en colaboraciones nacionales e internacionales y aunque en ningún caso el primer autor pertenece a la red sanitaria vasca, uno de ellos tiene como último firmante, a un profesional de esta comunidad.

Hospital Universitario Cruces - IIS BioCruces

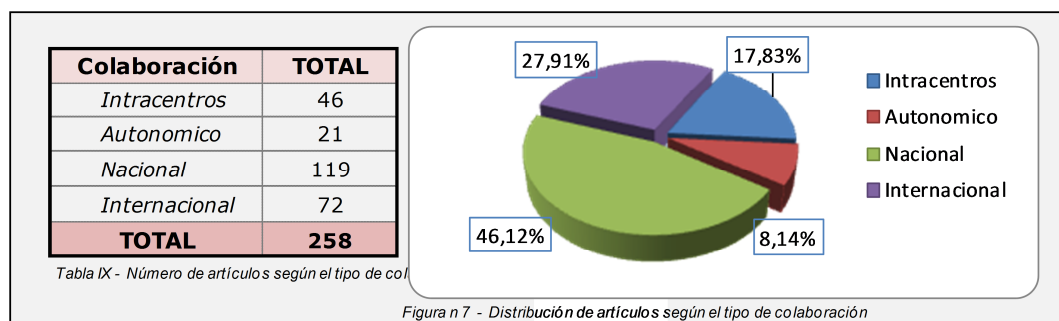

El listado total de artículos firmados por profesionales de este centro se encuentra adjunto al presente informe, en el Anexo I (paginas de la 1 a la 10).

De los 258 artículos registrados, 243 fueron publicados en revistas con factor de impacto, alcanzando un FI acumulado de 844.172.

La distribución por cuartiles de estas publicaciones es la siguiente:

El tipo de colaboración entre autores se distribuye del siguiente modo:

La siguiente tabla muestra la distribución por cuartiles de los artículos, considerando la nacionalidad de la revista en la que se publican.

Tipo Revista	Q1		Q2		Q3		Q4		TOTAL "Q"
	#	%	#	%	#	%	#	%	
Nacional	2	0,82%	4	1,65%	17	7,00%	36	14,81%	59
Internacional	87	35,80%	44	18,11%	37	15,23%	16	6,58%	184
TOTAL	89	36,63%	48	19,75%	54	22,22%	52	21,40%	243

Tabla X - Distribución de artículos según el tipo de revista y cuartil

La tabla y el gráfico que se muestran a continuación, reflejan la distribución de las colaboraciones en función del cuartil de la revista en la que se publica el trabajo.

Colaboración	Q1		Q2		Q3		Q4		TOTAL "Q"
	Nacional	Internacional	Nacional	Internacional	Nacional	Internacional	Nacional	Internacional	
Intracentros	1	8	1	6	2	7	8	8	41
Autonomico	0	8	0	1	1	2	4	3	19
Nacional	1	35	0	24	12	17	20	3	112
Internacional	0	36	3	13	2	11	4	2	71
TOTAL	2	87	4	44	17	37	36	16	243
	0,82%	35,80%	1,65%	18,11%	7,00%	15,23%	14,81%	6,58%	

Tabla XI - Distribución de artículos según el tipo de colaboración y cuartil

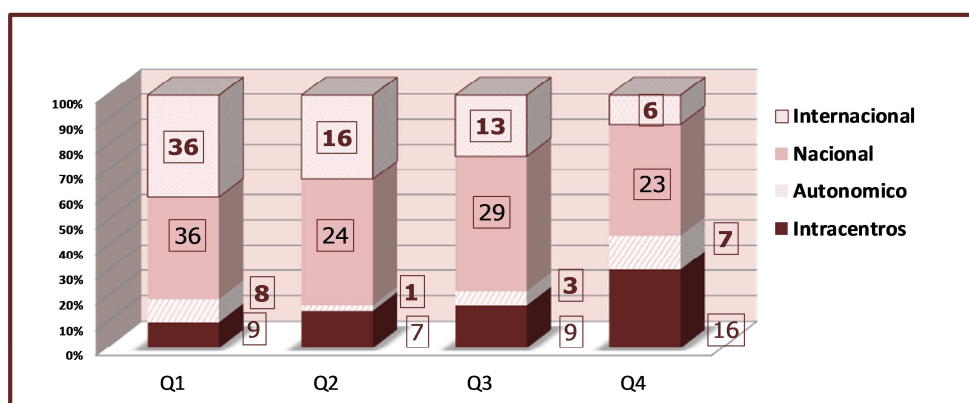

Figura n. 8 - - Distribución de artículos por cuartil, según el tipo de colaboración.

Es reseñable que las publicaciones del Hospital Universitario Cruces - IIS BioCruces, se publican en revistas del primer cuartil con una frecuencia superior a la media y que las colaboraciones que con mayor frecuencia generan los trabajos aquí reseñados, son de ámbito nacional, seguidas de las internacionales.

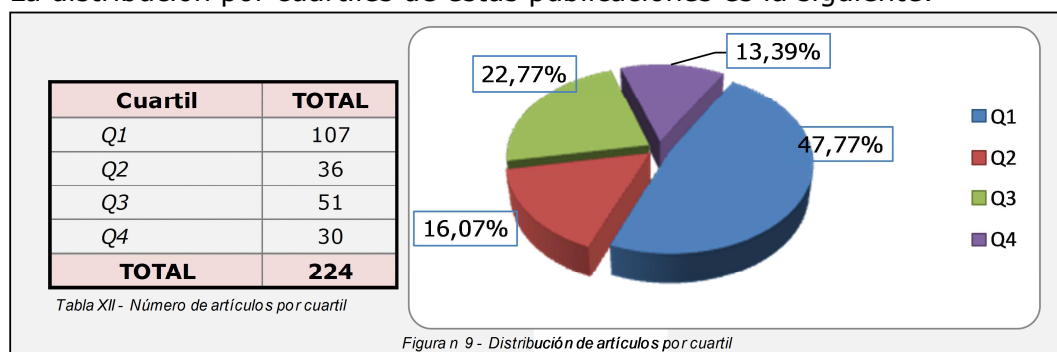

Hay que destacar el altísimo FI acumulado logrado por este centro, así como su participación en tres de los diez artículos con mayor FI destacados anteriormente.

Hospital Universitario Donostia – IIS BioDonostia

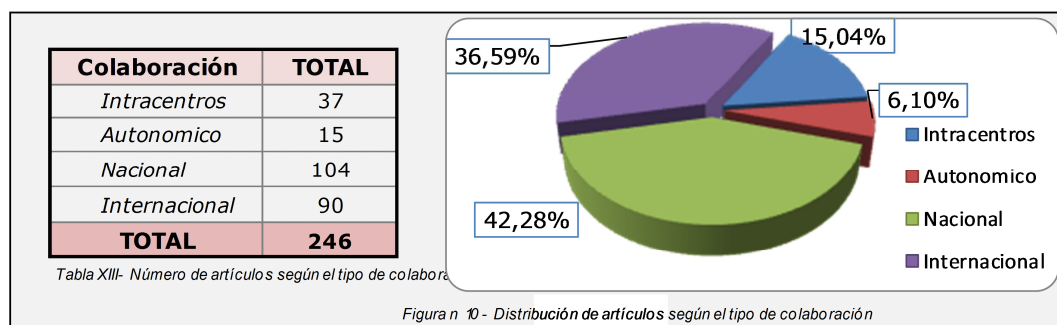

El listado total de artículos firmados por profesionales de este centro se encuentra adjunto al presente informe, en el Anexo I (paginas de la 11 a la 20).

De los 246 artículos registrados, 224 fueron publicados en revistas con factor de impacto, alcanzando un FI acumulado de 818.108.

La distribución por cuartiles de estas publicaciones es la siguiente:

El tipo de colaboración entre autores se distribuye del siguiente modo:

La siguiente tabla muestra la distribución por cuartiles de los artículos, considerando la nacionalidad de la revista en la que se publican.

Tipo Revista	Q1		Q2		Q3		Q4		TOTAL "Q"
	#	%	#	%	#	%	#	%	
Nacional	2	0,89%	1	0,45%	20	8,93%	19	8,48%	42
Internacional	105	46,88%	35	15,63%	31	13,84%	11	4,91%	182
TOTAL	107	47,77%	36	16,07%	51	22,77%	30	13,39%	224

Tabla XIV - Distribución de artículos según el tipo de revista y cuartil

La tabla y el gráfico que se muestran a continuación, reflejan la distribución de las colaboraciones en función del cuartil de la revista en la que se publica el trabajo.

Colaboración	Q1		Q2		Q3		Q4		TOTAL "Q"
	Nacional	Internacional	Nacional	Internacional	Nacional	Internacional	Nacional	Internacional	
Intracentros	1	1	0	1	13	3	6	0	25
Autonomico	0	8	0	0	0	5	0	0	13

TOTAL	2	105	1	35	20	31	19	11	224
	0,89%	46,88%	0,45%	15,63%	8,93%	13,84%	8,48%	4,91%	

Tabla XV- Distribución de artículos según el tipo de colaboración y cuartil

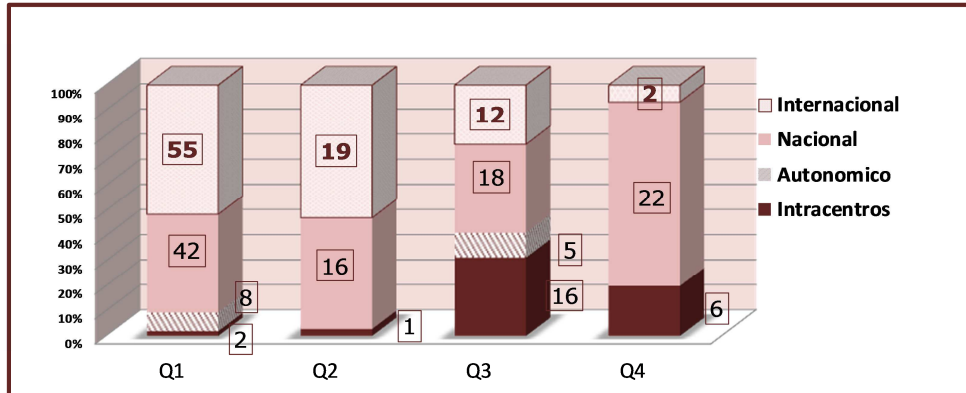

Figura n 11- - Distribución de artículos por cuartil, según el tipo de colaboración.

La distribución por cuartiles de las publicaciones de este centro no se aleja de la media general, sin embargo sí lo hace el patrón de colaboraciones en el que destaca la ligeramente superior frecuencia de colaboraciones nacionales.

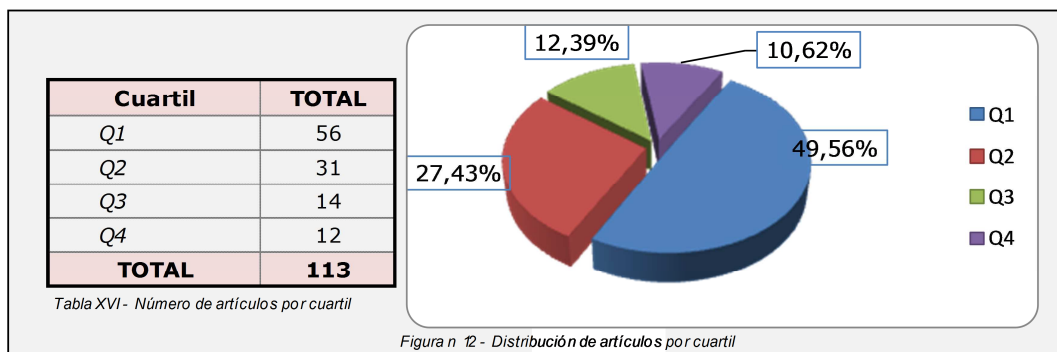

Asimismo, es reseñable el también elevado FI generado por este centro.

Hospital Universitario de Araba

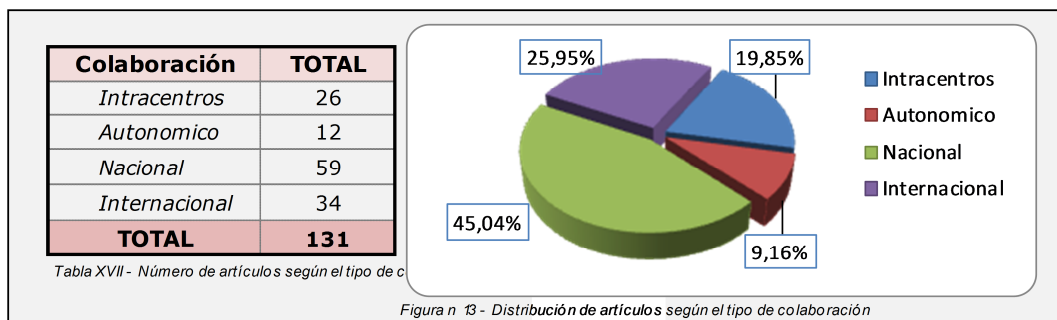

El listado total de artículos firmados por profesionales de este centro se encuentra adjunto al presente informe, en el Anexo I (paginas de la 21 a la 25).

De los 131 artículos registrados, 113 fueron publicados en revistas con factor de impacto, alcanzando un FI acumulado de 606.782.

La distribución por cuartiles de estas publicaciones es la siguiente:

El tipo de colaboración entre autores se distribuye del siguiente modo:

La siguiente tabla muestra la distribución por cuartiles de los artículos, considerando la nacionalidad de la revista en la que se publican.

Tipo Revista	Q1		Q2		Q3		Q4		TOTAL "Q"
	#	%	#	%	#	%	#	%	
Nacional	0	0,00%	4	3,54%	7	6,19%	8	7,08%	19
Internacional	56	49,56%	27	23,89%	7	6,19%	4	3,54%	94
TOTAL	56	49,56%	31	27,43%	14	12,39%	12	10,62%	113

Tabla XVIII - Distribución de artículos según el tipo de revista y cuartil

La tabla y el gráfico que se muestran a continuación, reflejan la distribución de las colaboraciones en función del cuartil de la revista en la que se publica el trabajo.

Colaboración	Q1		Q2		Q3		Q4		TOTAL "Q"
	Nacional	internacional	Nacional	internacional	Nacional	internacional	Nacional	internacional

	0,00%	49,56%	3,54%	23,89%	6,19%	6,19%	7,08%	3,54%	

Tabla XIX - Distribución de artículos según el tipo de colaboración y cuartil

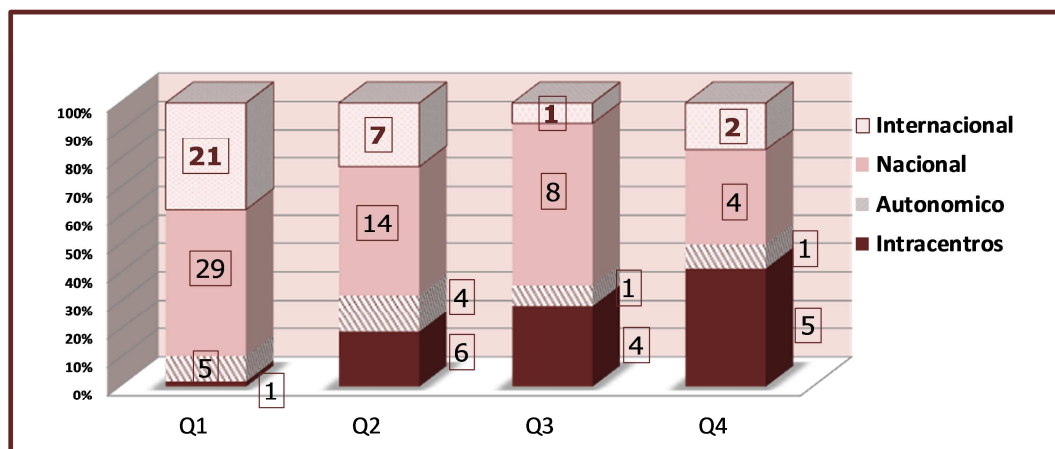

Figura n 14 - - Distribución de artículos por cuartil, según el tipo de colaboración.

La distribución por cuartiles de las publicaciones de este centro, no se alejan de la media general, sin embargo sí lo hace el patrón de colaboraciones en el que destaca la ligeramente superior frecuencia de colaboraciones nacionales.

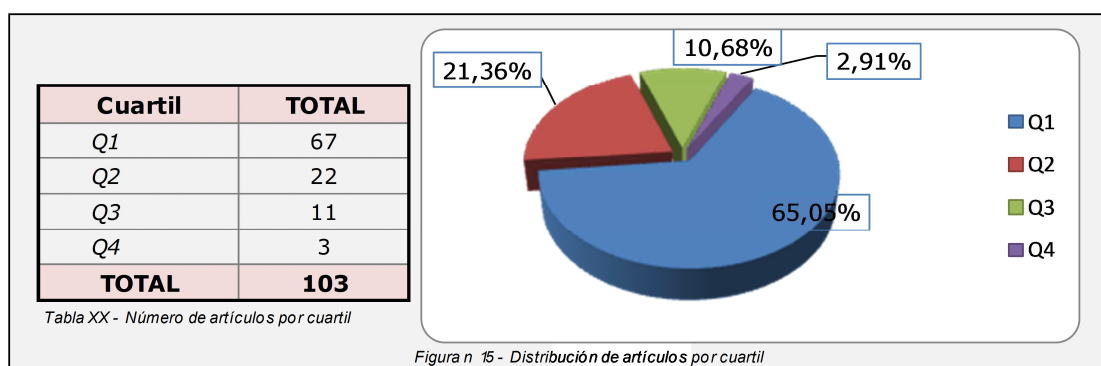

Asimismo, es reseñable el también elevado FI generado por este centro, así como su participación en seis de los diez artículos con mayor FI destacados anteriormente.

Departamento de Salud del Gobierno Vasco.

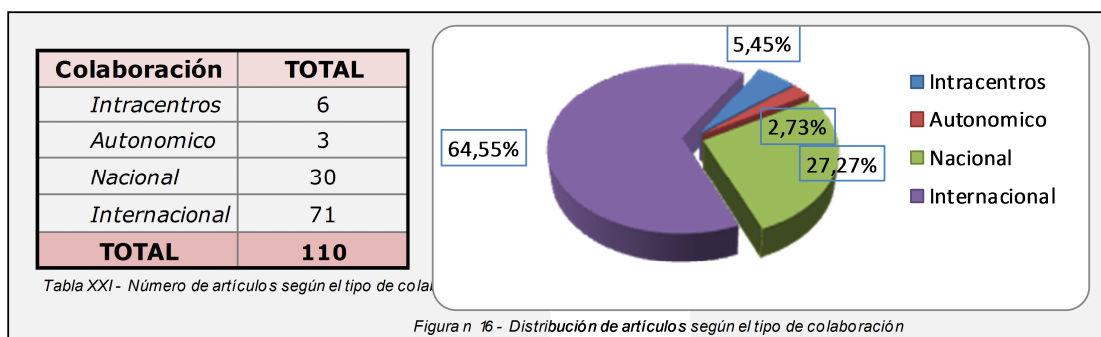

El listado total de artículos firmados por profesionales de este centro se encuentra adjunto al presente informe, en el Anexo I (paginas de la 26 a la 29).

De los 110 artículos registrados, 103 fueron publicados en revistas con factor de impacto, alcanzando un FI acumulado de 497.461.

La distribución por cuartiles de estas publicaciones es la siguiente:

El tipo de colaboración entre autores se distribuye del siguiente modo:

La siguiente tabla muestra la distribución por cuartiles de los artículos, considerando la nacionalidad de la revista en la que se publican.

Tipo Revista	Q1		Q2		Q3		Q4		TOTAL "Q"
	#	%	#	%	#	%	#	%	
Nacional	0	0,00%	0	0,00%	5	4,85%	1	0,97%	6
Internacional	67	65,05%	22	21,36%	6	5,83%	2	1,94%	97
TOTAL	67	65,05%	22	21,36%	11	10,68%	3	2,91%	103

Tabla XXII - Distribución de artículos según el tipo de revista y cuartil

La tabla y el gráfico que se muestran a continuación, reflejan la distribución de las colaboraciones en función del cuartil de la revista en la que se publica el trabajo.

Colaboración	Q1		Q2		Q3		Q4		TOTAL "Q"
	Nacional	Internacional	Nacional	Internacional	Nacional	Internacional	Nacional	Internacional

TOTAL	0	67	0	22	5	6	1	2	103
	0,00%	65,05%	0,00%	21,36%	4,85%	5,83%	0,97%	1,94%	

TablaXXIII - Distribución de artículos según el tipo de colaboración y cuartil

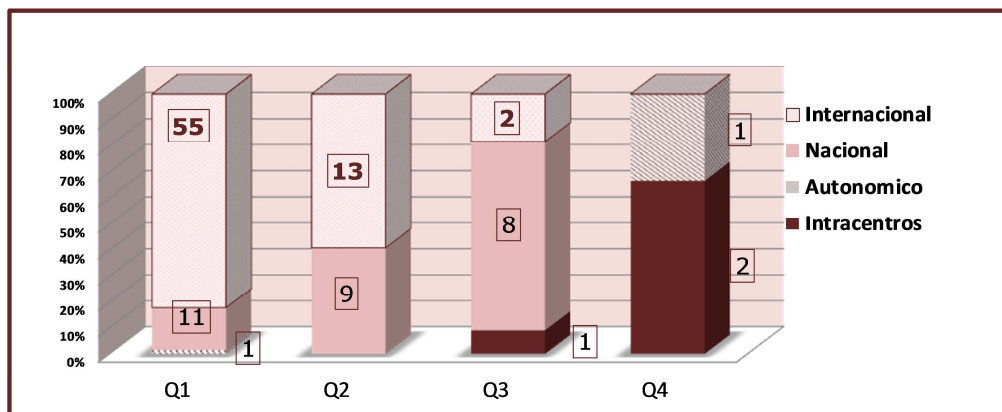

Figura n 17 -- Distribución de artículos por cuartil, según el tipo de colaboración.

Este centro, publica más del 65% de los artículos en revistas del primer cuartil acumulando más de 76% si se considera también el segundo. Las colaboraciones internacionales destacan sobre el resto con más 64 % del total.

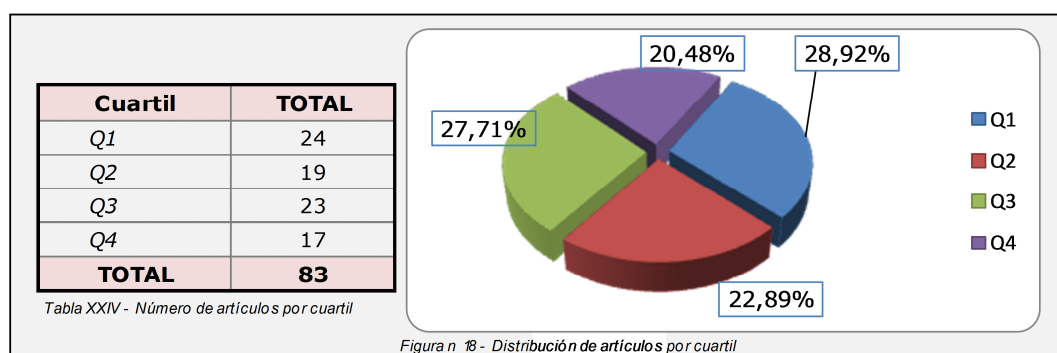

Asimismo, es reseñable el también elevado FI generado por este centro, así como su participación en cuatro de los dos artículos con mayor FI destacados anteriormente.

Hospital Galdakao-Usansolo

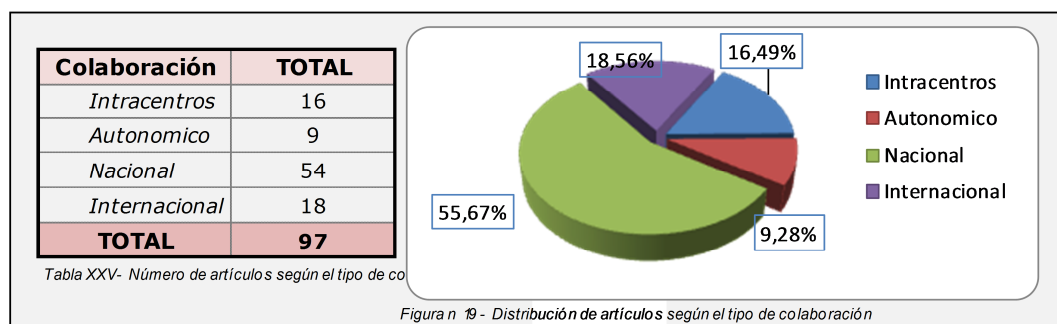

El listado total de artículos firmados por profesionales de este centro se encuentra adjunto al presente informe, en el Anexo I (paginas de la 30 a la 33).

De los 97 artículos registrados, 83 fueron publicados en revistas con factor de impacto, alcanzando un FI acumulado de 258.875.

La distribución por cuartiles de estas publicaciones es la siguiente:

El tipo de colaboración entre autores se distribuye del siguiente modo:

La siguiente tabla muestra la distribución por cuartiles de los artículos, considerando la nacionalidad de la revista en la que se publican.

Tipo Revista	Q1		Q2		Q3		Q4		TOTAL "Q"
	#	%	#	%	#	%	#	%

Tabla XXVI - Distribución de artículos según el tipo de revista y cuartil

La tabla y el gráfico que se muestran a continuación, reflejan la distribución de las colaboraciones en función del cuartil de la revista en la que se publica el trabajo.

Colaboración	Q1		Q2		Q3		Q4		TOTAL "Q"
	Nacional	Internacional	Nacional	Internacional	Nacional	Internacional	Nacional	Internacional	
Intracentros	0	1	0	1	4	4	0	2	12
Autonomico	0	1	0	6	0	1	0	1	9
Nacional	0	11	0	10	4	7	10	4	46
Internacional	0	11	0	2	1	2	0	0	16
TOTAL	0	24	0	19	9	14	10	7	83
	0,00%	28,92%	0,00%	22,89%	10,84%	16,87%	12,05%	8,43%	

TablaXXVII - Distribución de artículos según el tipo de colaboración y cuartil

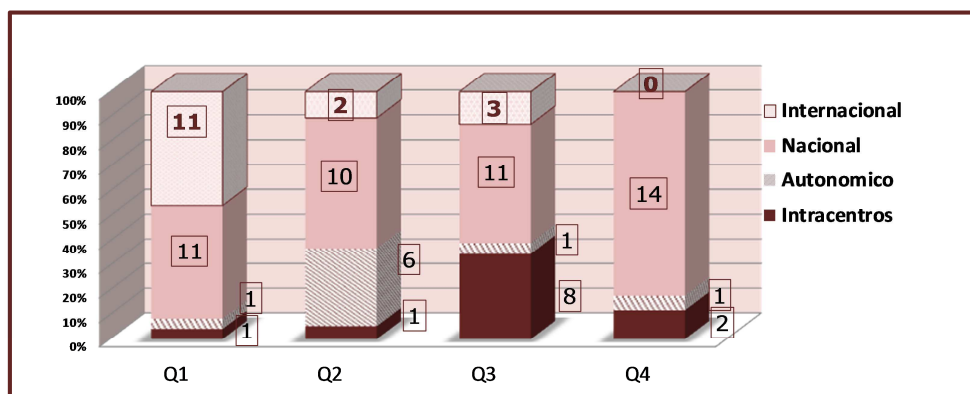

Figura n 20 - - Distribución de artículos por cuartil, según el tipo de colaboración.

Las publicaciones más frecuentes se dan en el primer cuartil, seguidas del segundo, sumando entre ambos, más del 42% de las publicaciones totales. En cuanto al perfil de colaboración, las nacionales son, otra vez, las más frecuentes, seguidas en este caso de las internacionales o intracentro.

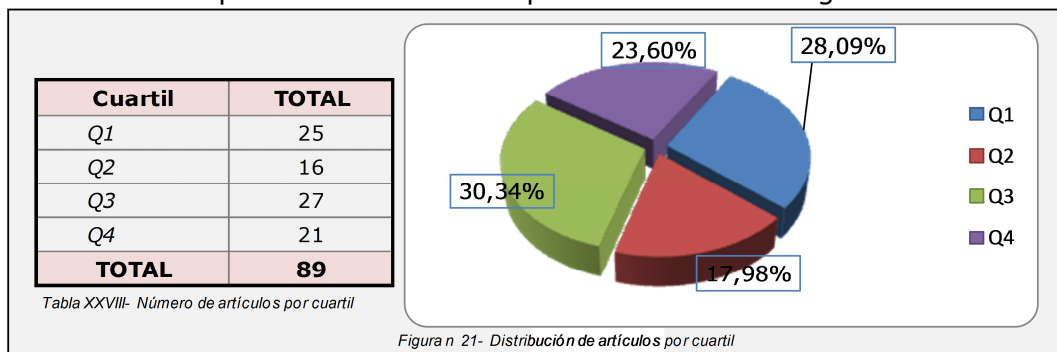

El FI acumulado por los artículos firmado por los profesionales de este centro, sobrepasa los 250 puntos, lo cual es llamativo, considerando el número de publicaciones con impacto en las que participa.

Hospital Universitario de Basurto

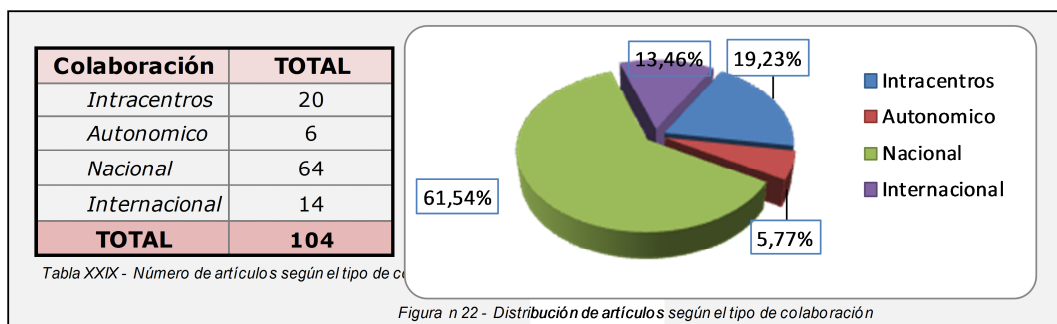

El listado total de artículos firmados por profesionales de este centro se encuentra adjunto al presente informe, en el Anexo I (paginas de la 34 a la 37).

De los 104 artículos registrados, 89 fueron publicados en revistas con factor de impacto, alcanzando un FI acumulado de 255.558.

La distribución por cuartiles de estas publicaciones es la siguiente:

El tipo de colaboración entre autores se distribuye del siguiente modo:

La siguiente tabla muestra la distribución por cuartiles de los artículos, considerando la nacionalidad de la revista en la que se publican.

Tipo Revista	Q1		Q2		Q3		Q4		TOTAL "Q"
	#	%	#	%	#	%	#	%	
Nacional	2	2,25%	2	2,25%	17	19,10%	11	12,36%	32
Internacional	23	25,84%	14	15,73%	10	11,24%	10	11,24%	57
TOTAL	25	28,09%	16	17,98%	27	30,34%	21	23,60%	89

Tabla XXX - Distribución de artículos según el tipo de revista y cuartil

La tabla y el gráfico que se muestran a continuación, reflejan la distribución de las colaboraciones en función del cuartil de la revista en la que se publica el trabajo.

Colaboración	Q1		Q2		Q3		Q4		TOTAL "Q"
	Nacional	Internacional	Nacional	Internacional	Nacional	Internacional	Nacional	Internacional	
Intracentros	1	0	2	1	5	0	1	1	11

CONCLUSIONES

- La producción bibliométrica de los profesionales de la red sanitaria vasca se mantiene estable respecto a años anteriores pero su factor de impacto acumulado ha crecido y, en total, alcanza los 2756.936 puntos.
- La revista con mayor FI en la que han publicado los profesionales de la red sanitaria pública vasca es el "New England Journal of Medicine" con un FI de 54.420 con un artículo firmado por el Dr. Fernando Aros del Hospital Universitario de Araba. La siguiente revista en cuanto a FI es Lancet, en la que se publicó un artículo firmado por el Dr. Luis Cataño y en tercer lugar JAMA, con tres artículos formados por los Doctores Felipe Aizpuru, Joaquín Duran, Juan José Arrizabalaga, y José Bautista Martínez.,
- Los 10 artículos publicados en las revistas con mayor FI, suman 291.981 lo cual constituye un 10,59 % del FI acumulado total. Para estos artículos, el FI medio por artículo es de 29.198, mientras que para el resto, el FI medio es 3.766. Los centros que han participado en estos artículos tan exitosos son: el Hospital Universitario Cruces - IIS BioCruces, el Departamento de Salud del Gobierno Vasco, en concreto, la Subdirección de Salud Pública de Gipuzkoa y el H.U. Araba. Es de destacar la relevante participación del Hospital Universitario de Araba que firmaba seis de estos diez artículos.
- Al considerar el FI acumulado por centro, los centros con mayor FI son los cinco grandes hospitales e Institutos de nuestra comunidad y el propio Departamento de Salud. Resulta enormemente destacable el valor alcanzado por el Hospital Universitario Cruces - IIS BioCruces, con un valor de 844.172 La producción bibliométrica de los profesionales de la red sanitaria pública vasca se realiza en revistas de alto impacto. El 40,57% se publica en revistas del primer cuartil, cifra que se acerca al 60% si se consideran conjuntamente con el segundo cuartil. Se desvían positivamente de estas cifras medias, el Hospital Universitario Donostia - IIS BioDonostia, el Departamento de Sanidad y Consumo, y el Hospital Universitario de Araba, que publican con mayor frecuencia que la media en revistas del primer cuartil. Los centros con menos de diez artículos, han superado el 20% de media, en publicaciones de primer cuartil.

- El principal tipo de colaboración es la estatal, mediante la que se produce el 44% de los artículos publicados. Las colaboraciones internacionales están detrás del 29% de artículos. Superan esta cifra, el Departamento de Salud del Gobierno Vasco, el Hospital Universitario Cruces - IIS BioCruces, y Hospital Universitario Donostia - IIS BioDonostia. Resulta llamativo el bajo porcentaje de artículos procedentes de colaboraciones de ámbito autonómico, 19%. Los centros con bajo número de artículos, colaboran muy frecuentemente de forma intracentro.
- El tipo de colaboración determina el impacto de la revista en la que el artículo llega a ser publicado, así, las colaboraciones internacionales, se publican de forma mayoritaria en revistas del primer cuartil y las nacionales se reparten entre el primero y el segundo cuartil.
- Con el fin de reflejar la producción bibliométrica de los profesionales de la red sanitaria pública vasca, sería de enorme valor avanzar en la mejora de la filiación de las autorías, de tal modo que el término Osakidetza apareciera en todos los casos correspondientes. Para mejorar la atribución de artículos a cada centro, sería también importante que los firmantes empleasen el nombre oficial del mismo, evitando traducciones frecuentemente inadecuadas.
- Por último, la existencia de servicios como el de traducciones que ofrece Bioef, son de enorme ayuda en la mejora de la capacidad de comunicación del trabajo de los profesionales de la sanidad vasca. Sería del todo interesante reforzar la efectividad del mismo, así como facilitar apoyo adicional a los profesionales con capacidad de generar conocimiento, así como mejorar la cultura de la publicación en todos los profesionales de la red.
